Product Description

Brownbuilt Commercial Shelving is the perfect answer for any type of office with restricted space and has been developed to compliment modern efficient records management and storage systems.

Commercial Shelving combines the strength and durability of Light Duty RUT shelving with aesthetics and versatility to enhance modern office designs.

The powder coated finish and metal cover panels ensure a clean, attractive finish to the ends of shelving stacks.

Commercial Shelves	30	✓	✓	✓	✓

900mm wide Commercial Shelf Load Capacity 110kg (UDL) 1200mm wide Commercial shelf load capacity 75kg (UDL)

NOTE: Contact your nearest Brownbuilt office for information regarding customised Industrial shelving configurations.

Brownbuilt Commercial Shelving is pre-configured as freestanding “Starter Bays” and “Add-On Bays” as standard, in both single and double-sided carcasses for ease of design layout. Components are shipped in CKD form for ease of transport and assembled on-site by trained personnel.

Where storage requirements dictate a customised solution, Brownbuilt storage consultants and engineers can design and manufacture an individual shelving installation with tailored dimensions to maximise storage capabilities.

Durable thermo-set powder coat finishes, which are thicker and more scratch resistant than baked enamel, are used for all components. A wide range of standard contemporary colours allow Commercial Shelving to be integrated into most office environments. An extensive range of filing accessories, compatible with Brownbuilt Cupboards and Office CompakMax Storage Systems, facilitates individual office storage solutions.

11 Standard Colour Options
